Contents

1 Introduction **4**

2 Foundations **4**
2.1 Wikidata . . . 4
2.2 Taxonomy . . . 4
2.2.1 Ontology . . . 4
2.2.2 Directed graph . . . 4
2.2.3 Walks and paths . . . 4
2.2.4 Cycles . . . 4
2.2.5 Acyclic graph . . . 4
2.2.6 Class . . . 4
2.2.7 Statement . . . 4
2.2.8 Taxonomy . . . 4
2.2.9 Subclass-of relation . . . 4
2.3 Similarity . . . 4
2.3.1 Notion . . . 4
2.3.2 Semantic similarity . . . 4
2.3.3 Vector similarity . . . 4
2.4 Neural networks . . . 4
2.5 Text processing . . . 4
2.5.1 Bag-of-words . . . 4
2.5.2 N-gram . . . 4
2.5.3 Skip-gram . . . 4
2.5.4 Count-based word embeddings . . . 4
2.5.5 Predictive word embeddings . . . 4

3 Comparison of neural networks **4**
3.1 Neural network language models . . . 4
3.1.1 Continuous Bag-of-Words . . . 4

3.1.2 Skip-gram with negative sampling . . . 4
3.1.3 ?GloVe? . . . 4
3.2 Neural networks for graph representations . . . 4
3.2.1 Recursive neural networks . . . 4
3.2.2 Deep neural networks . . . 4

4 Algorithm **4**
4.1 Baseline algorithm . . . 4
4.2 Skip-gram model . . . 4
4.2.1 Hyper-parameters . . . 4
4.2.2 Training . . . 4
4.3 k-nearest-neighbors . . . 4
4.3.1 Similarity measure . . . 4
4.3.2 Inclusion of taxonomy . . . 4
4.4 Variations of baseline algorithm . . . 4

5 Evaluation **4**
5.1 Generation of ground truth . . . 4
5.2 Method used . . . 4
5.3 Results . . . 4

6 Conclusion **4**

1 Introduction

2 Foundations

2.1 Wikidata

2.2 Taxonomy

2.2.1 Ontology

2.2.2 Directed graph

2.2.3 Walks and paths

2.2.4 Cycles

2.2.5 Acyclic graph

2.2.6 Class

2.2.7 Statement

2.2.8 Taxonomy

2.2.9 Subclass-of relation

2.3 Similarity

2.3.1 Notion

2.3.2 Semantic similarity

2.3.3 Vector similarity

2.4 Neural networks

2.5 Text processing

2.5.1 Bag-of-words

2.5.2 N-gram

2.5.3 Skip-gram

2.5.4 Count-based word embeddings

2.5.5 Predictive word embeddings

3 Comparison of neural networks

3.1 Neural network language models

3.1.1 Continuous Bag-of-Words

3.1.2 Skip-gram with negative sampling

3.1.3 ?GloVe?

3.2 Neural networks for graph representations

3.2.1 Recursive neural networks

3.2.2 Deep neural networks

4 Algorithm

4.1 Baseline algorithm

4.2 Skip-gram model
